PROFILE

A Hong Kong citizen and diligent engineer having diverse work experience in engineering and tech. As a continuous learner, my recent focus has been on upskilling, earning cloud certifications and developing ETL pipelines to sharpen my expertise. Seeking a challenging opportunity where I can apply my knowledge to contribute to innovative projects and create a tangible impact.

PROFESSIONAL EXPERIENCE

Data Scientist/ Fraunhofer IIS, Germany **2024-2025**

- Designed and implemented scalable end-to-end machine learning pipelines to analyse production sensor data
- Managed and scheduled complex data workflows using Apache Airflow and Python on the AWS cloud platform
- Increased operational efficiency and reduced manual effort by 20% through pipeline automation

Machine Learning Research Intern/ University of Erlangen-Nürnberg, Germany **2023-2024**

- Developed and tested methods to compress ML models without reusing training data on PyTorch
- Compressed models by 75% with minimal loss in accuracy and reduced inference time by 33%

Data Analyst/ Preface Coding, Hong Kong **2021-2023**

- Built ETL pipelines to extract transactional and event data from a web app with 20000 users
- Performed advanced analytics functions and data modelling
- Utilised SQL and Power BI to create 15+ dashboards and ad hoc reports to support the business in making data-driven decisions

PROJECTS

F1 Data Project

- Built an end-to-end data pipeline on AWS using Python, Airflow, and Cloud Functions for analysis of F1 data from an API
- Executed SQL analysis to compare the driver's lap time data
- Created a [website](#) to host the results and offer users opportunities to compare different drivers

EDUCATION

M.S Data Science/ University of Erlangen-Nürnberg, Germany **2022-2025**

B.Eng Electrical and Electronic Engineering/ University of Bath, UK **2016-2020**

SKILLS

Programming: Python, JavaScript, C

Data and Analytics: MySQL, PostgreSQL, Airflow, Spark, Power BI

Computer Skills: Git, Microsoft Office

Machine Learning/AI: PyTorch

Cloud Platforms: AWS, Azure

Languages: English, Mandarin, German
